

## Vice Chair of Research

Outstanding opportunity for a highly motivated Emergency Physician who has successful track record in all aspects of clinical research and is interested in continuing research efforts while building research infrastructure in a newly established Department of Emergency Medicine. Successful applicant will have broad scope of responsibility to oversee research mission of department, and will have access to broad resources, e.g. funding stream and generous start-up funds to ensure success.

## Faculty Position

The Department of Emergency Medicine at the University of Wisconsin School of Medicine & Public Health (Madison, WI) primarily staffs the University of Wisconsin Hospital & Clinic (UWHC) - one of only two academic medical centers, and level I Trauma (adult & pediatrics) and Burn Centers, in the state of Wisconsin. UWHC is building a second hospital in close proximity that will also be staffed by UW EM faculty, starting July 2015. In anticipation of the opening of the new hospital and new ED, we are hiring several faculty into academic, community, or hybrid positions.

## Fellowship Positions

**UW Medflight Fellow** participates in the management, administration, and clinical staffing of one of only a handful of physician-led and physician-staffed Critical Care Transport and Helicopter EMS (HEMS) programs in the country. This program will prepare graduates to lead HEMS programs. **UW Medical Simulation Fellow** participates in a robust simulation program that incorporates medical students, residents, faculty development, multidisciplinary simulations and more, through the full spectrum of scenario creation, technical training, program management, and research. This program will prepare graduates to lead an academic/community simulation program.

Compensation and benefits are extremely competitive.

Inquiries should be accompanied by a CV and sent to:

**Azita G. Hamedani, MD, MPH, Chair, Department of Emergency Medicine,
