Educational advances are structured reports of innovative curricular interventions and meaningful insights gained through the implementation of new ideas.

- **BACKGROUND** – Explain to the reader why the educational innovation is important. What is the rationale for developing the innovation?
- **OBJECTIVES** – Clearly describe the educational objectives.
- **CURRICULAR DESIGN** – Provide a detailed description of the curricular innovation including the development and implementation of the innovation. Why was the educational method chosen? Provide a concise description of the innovation (resources, logistics, tips for success, challenges, lessons learned, etc.)
- **IMPACT / EFFECTIVENESS** – What methods were used to assess the learner or evaluate the innovation? How can the innovation be applied to other programs. How the innovation will impact or has impacted current educational practice.

Although abbreviated in length, “Brief Educational Advances/Innovations” should still have pilot data to support the impact / effectiveness of the innovation. These submissions will have a 1000 word count limit and up to 1 table or figure, they do not require a structured abstract.

**Figures/Tables**

- Must include original file used to create graphs/figures (e.g. excel, word, etc.)
- Remove any titles or bold fonts in graphs/figures
